

Desirae Bernt, a new Boyd County paraprofessional joined us in September. Her job before coming to Boyd County was a Medical Aid in Bonesteel. She came to Boyd County because some of her family members live here. The only thing that she really needed to become a para was a high school degree and an associates degree. Her first impression was that the teachers were nice and good at showing here where to go and what she has to do. The students were helpful and willing to learn. Bernt likes it here and if she ever had the opportunity to move positions to a teacher or something higher she would take it.
